

# DERMAPLANING CONSENT

@lashuppro | www.lashuppro.ca

### Skin type:

- Dry  Combination
- Oily  Mature/sensitive

- I understand that Dermaplaning involves the use of a sterilized surgical blade to remove fine vellus hair from the face, and provide light exfoliation
- Due to contours of the face, certain areas of the face (such as eyelids and nose) are not treatable using this method
- After your treatment, SPF 30+ MUST be worn at all times
- Aerobic exercise or vigorous physical activity should be avoided until all redness has subsided.
- The nature and purpose of Dermaplaning has been explained to me and any questions I have regarding the treatment have been answered to my satisfaction prior to procedure
- I understand that the treatment may involve the risk of complication or injury and I freely assume those risks. Possible side effects of the treatment area can include mild redness, mild irritation, and dryness. Additionally, nicks to the skin can occur due to the sharp surgical blade. The hair that grows back will not be darker or thicker, however I do understand that any hormone imbalance present within my anatomical system can alter the normal hair growth pattern

### Conditions

- Active acne  Rosacea
- Active infection  Scleroderma Skin cancer
- Any raised lesions  Sunburn
- Any recent chemical peel procedures  Tattoos
- Chemotherapy or radiation  Thick, dark facial hair
- Eczema or Dermatitis Hemophilia  Uncontrolled diabetes
- Oral blood thinner medications  Use of Accutane within the last year
- Pregnancy
- Use of Glycolic acids, Alpha-hydroxy acids and Retin-A
